A page of a handwritten account book with various entries. The entries include dates, names, amounts, and descriptions. The handwriting is legible but requires careful reading. There are references to Sandhill, Sandhill at New Strand, and dates such as 14/6/23 and 18/6/23. The entries also mention locations, possibly related to agriculture or livestock. The page seems to be from a record keeping context, possibly related to a farm or estate account.

Afternoon early went for a swim in the lake and then walked to the Camp. It rained heavily all day. Went to Lalginia Lake near Camp. Lot of water. Very nice looking country. "Inkara" very nice. Took a walk through the country. Very nice collecting for the herbarium, especially for ferns. It was a very pleasant day.

Sunday 6th July 1924
Ran all night but for many minutes till 10 then ran all day with Thorne. Thorne got again in trouble. A few Burbars including 3. schwarzi and 1 from sandhill at Lalginia. Lot of water here in the Lalginia line. Two E. E. Schwarzi and one large E. stricta.
On Monday 7th July, early in the morning, went to a hill S. E. of Station Lalginia. Afternoon in hill S. E. of Station Lalginia.

Sunday 29th July 1924. A dull warm day with rain in afternoon. Took car to Lisdoonvarna, Cahir Valley & Ahoghill to meet (G.J. Blake Harr), Len slept a couple of hours on train in night rain, after we left Cahir. Len went on to Lisdoonvarna. Only attraction was a hot odyssey picture at foot. It was cold on the evening car before.

Stopped for tea at roadside about 7 miles N.J. Marybourgh, Roscrea. Got wet walking but Birr house warm, best start, Gibson & Gibson a promise.

1925.

On 1st February 1925 I took a Q.V. up Dunloe under a stone bridge. The cause of death of a monkey (Pithecia) on the Brooklyn boundary. The will never be one in quite the way. The monkey had no sign of life, but had come round slightly by the time I left it home. Its wings were folded along the underside of the abdomen, so that they just covered the sting. The legs & antennae were carried in a peculiar position, something like that round in the goblet hole. I had a mouth with a bit of the skin in a summit of the cause of death. 21st March 1925. I took the remains of a Q.V. and placed it under a stone of the same mass. 2,311 feet. C. Dublin.

8th March. Some species reported on the banks of the River breweries, C. Dunlop.

15th March 1925. Many willow work. Some greyhounds & Boxing known near at Q. Tree there. The end of Dunloe. But a jest just missing flowers!

Sunday 22nd March 1925.

A fine day with the sun but very cold. We made in morning fishing. Here mor down at 7 O'clock today. At 12 noon Captured a 5'6" Atlantic salmon in Castletown. The salmon during a strong wind. The Gillen show a good line have not yet in them.

In the afternoon in Glencullen. 25" Atlantic salmon fly fishing found a 5'5" salmon in a strong wind. 4 P.M. as well as several Brownies known.

On 12th March 1925. I think it is a gypsy. But it other people. Easy to recognize.
